

# Mr Bhupinder Singh Mann BSc MBBS MRCS FRCS

GMC No. 4650605

## Professional description

Consultant Trauma and Orthopaedic Surgeon with a special interest in hip and knee surgery

## Qualifications

2017	Cardiff University	Bond Solon Expert Witness Certificate
2011	University College London Hospital	CCST
2009	Royal College Surgeons Edinburgh	FRCS Tr&Orth
2003	Royal College Surgeons Edinburgh	MRCS
1999	St Bartholomew's and the Royal London School of Medicine	MBBS
1998	University College London	BSc (Hons)

## Personal details

Date of Birth	14/07/1975
Nationality	British
Address	The Chiltern Hospital, London Road, Great Missenden, HP16 OEN
Telephone	07740 654321
Email	<a href="mailto:Info@hipandknee.london">Info@hipandknee.london</a>
Organisations	The Royal College of Surgeons of Edinburgh British Orthopaedic Associations American Academy of Orthopaedic Surgeons

## Medicolegal practice

I have completed the Bond Solon Cardiff University Civil Expert Witness Course. This very focused type of training combined with my high volume practice ensures high standards of expert reporting. I now also appear on the National Register of University Certificated Expert Witnesses. My areas of special interest include orthopaedic trauma, hip and knee arthroplasty (Primary, complex primary and revision), knee arthroscopy, cruciate ligament reconstruction and sports injuries around the knee. Currently my main focus is on the timely production of high quality defendant and claimant personal injury expert reports. I aim to book an appointment within 2 weeks of instruction (earlier if requested) and reports within 7 days of having seen the client. I am available for case conference and court attendance subject to prior approval of appropriate fees and schedules.

## Practice details

Stoke Mandeville and Wycombe General Hospital  
Buckinghamshire Hospitals NHS Trust

Private Practice  
The Chiltern Hospital, Great Missenden  
The Wellington Hospital, London

## Professional management, leadership and positions of responsibility

I constantly seek to inspire and develop those around me. I possess the ability to influence and drive change where appropriate to deliver high impact lean solutions. For example in my current post I am the clinical lead on the improving elective performance initiative to optimize arthroplasty care pathway efficiency. This involves chairing daily multidisciplinary team meetings in a bid to identify and resolve key patient care issues as soon as possible thereby allowing for enhanced recovery and decreased average length of stay times.

Associate Medical Director of Buckinghamshire Healthcare Acute Integrated Trust April 15 – April 16

Roles and responsibilities

Providing leadership to the trust mortality work

Identification of ways of working which improve the HSMR

In conjunction with the communication team provided leadership on trustwide awareness posters focusing on the hospital standardized mortality ratio and the need for accurate coding of diagnosis, procedures and comorbidities to enable better risk adjustment of the HSMR figure.

Leadership on key audits including cardiac arrests, admissions to ITU and End of life care data.

Providing leadership on the trustwide dissemination of lessons learned.

Chairing the New Clinical Procedures Committee, the deteriorating patient gp, the mortality reduction group

Attended the Serious untoward incident meetings and the mortality steering group meeting.

Providing assurances to key stakeholders eg Trust development authority, CQC and CCGs.

I also undertook case manager training

On occasion provided cover for the medical director.

Monthly sign off of key performance indicators on the Health and social care information centre.

I am also currently the departmental audit lead

I have also laid down the foundations to begin collaborations with the Human Performance Centre at Bucks University and also the Patient Safety Academy at Oxford University. At Bucks New University I chair a research meeting every six weeks and also lecture on the Sports Therapy Degree programme. I am currently in the process of finalising plans with voluntary services which will enable sports therapy students to come along to theatres at Wycombe and watch myself and my colleagues perform sports and reconstructive surgery
